1.10.245809.0

Release Note • 7/2/2025 • 1 min read

Enhancements/Modifications

With this release of the Aptean Azure Blob Storage extension, the translation file for the Chinese (zh-CN) language has been added.

1.9.228731.0

Release Note • 4/25/2025 • 1 min read

Enhancements/Modifications

The translation files for the Swedish (sv-SE) language have been updated with standard texts for better readability.

1.8.188686.0

Release Note • 10/17/2024 • 1 min read

Enhancements/Modifications

With this release of the Aptean Azure Connector extension, the Aptean Export Rapidstart Package extension can access and use the functionality of this extension.

Note

Aptean Export Rapidstart Package is an internal extension. These are technical updates, and no changes are required to your setup or processes.

1.7.178711.0

Release Note • 8/23/2024 • 1 min read

Enhancements/Modifications

With this release of the Aptean Azure Connector extension, modifications have been made to accommodate the following changes:

- Enhanced application interaction: Procedures have been added to enhance the application interaction, improve upgrade tag management, streamline upgrade and installation processes, and provide additional flexibility by managing upgrades on a per-company and per-database basis.
- Application area refresh: Updates have been implemented to improve the application area refresh process by integrating a new procedure into the *Enable* codeunit.
- Improved management of install and upgrade code: The *Install* and *Upgrade* codeunits have been updated to streamline the handling of installation, reinstallation, and upgrade processes, ensuring smoother transitions and minimizing disruptions during these operations.
- Centralized license management procedures: The existing license management codeunit has been modified to use centralized license management procedures, further reducing the need for application-specific adjustments.
- Enhancements have been made to update the process within the application to handle the *User Group* and *User Group Permission Set* tables. This change ensures compatibility with current and future versions of Business Central, even when the *User Group* and *User Group Permission Set* tables are deprecated.

! Note

The *User Group* and *User Group Permission Set* tables are deprecated in Business Central, version 25.

1.6.160264.0

Release Note • 5/15/2024 • 1 min read

Enhancements/Modifications

The Swedish translation files have been updated with standard texts for better readability.

1.5.146797.0

Release Note • 3/6/2024 • 1 min read

Resolved issues

The following issue has been resolved in this release:

ID	Description
183004	The system is unable to synchronize data associated with the Aptean BI extension for multiple customers when utilizing the web server.

1.4.91554.0

Release Note • 5/24/2023 • 1 min read

Enhancements/Modifications

Modifications were made for this extension to accommodate the changes in the Aptean Compliance Documents extension (1.7.92887.0). To know more, see [What's new in version 1.7.92887.0](#)

1.4.54478.0

Release Note • 4/29/2023 • 1 min read

Resolved Issues

The following issue has been fixed in this release:

ID	Description
58536	Due to an unexpected date format, Azure Blob Storage fails during authentication.

1.3.48303.0

Release Note • 4/29/2023 • 1 min read

Enhancements / Modifications

The enhancements in this release are listed below:

- A localized version of Aptean Azure Connector extension is made available for the Switzerland market with the addition of German language code [de-CH].
- Minor technical changes are made to keep our apps in line with *updated* coding guidelines for Business Central.

Introduction

Article • 4/29/2023 • 1 min read

The Aptean Azure Blob Storage (AAC) extension supports seamless file exchange between Business Central Online and Azure Blob Storage.

Set up your containers in Azure Blob Storage to be able to use the integration offered in this extension. You can maintain and monitor the containers from Business Central.

Setup

Article • 12/23/2024 • 1 min read

The following setup is required.

- [Manage permission sets](#)

Manage permission sets

Article • 12/23/2024 • 3 min read

Permission sets in Business Central define a user's access level to various features and data within this extension. We provide the direct permission set.

Direct permission sets

Users with this permission set can perform specific actions directly without requiring additional approvals or workflows. These sets include permissions to read, modify, delete, and create data.

The direct permission set ID for this extension is *AZBLOBSTORAGEAPIFDW*.

User-defined permission sets

In addition to the system permission set we provide, you can create new permission sets or copy system permission sets and modify or delete access to specific entities according to your requirements. For more information, see [Assign permissions to users and groups](#).

Assign a permission set

1. Select the Search icon , enter **Users**, and then choose the related link.
The **Users** list page opens.
2. Navigate to the username for which you want to assign the permission set and select it.
The **User Card** page opens.
3. On the **User Permission Sets** FastTab, in the **Permission Set** field, enter the valid permission set for this extension.
The associated fields are automatically updated based on the entered value. The user has the necessary permissions to use the features of the Aptean Azure Blob Storage extension, ensuring secure and role-based access.

Aptean Blob Storage Connection

Article • 4/29/2023 • 7 min read

This functionality enables the user to connect to Microsoft Azure Storage Explorer, thus providing the capability to exchange files between Business Central and Azure Storage Explorer.

To create a new connection:

1. Search for **Blob Storage Connections** and select the relevant link.

2. On the ribbon, select **New** to create a new connection card.

3. A blank Connection Card page will open.

- In the **Code** field, provide a name/identifier for the new Connection Card.
- In the **Storage Account Name** field, provide the name of the Storage Account which you want to establish a connection with.
- In the **Description** field, provide a description for the Connection Card.
- In the **Secret** field, provide the shared access signature token or Shared Key.
- In the **Source Container Name** field, provide the name of the Container in the Storage Account which you want to upload/download files to/from.

4. Once you have filled all the above information, you will be able to perform operations with the specified Storage Account and Container.

5. On the ribbon, you will be able to see 4 actions buttons:

- a. View Container:

This action button can be used to view the contents in the Source Container Name mentioned in the Connection Card.

- i. Select **View Container > List Contents of Source**.

Container Contents list displays where you can see the contents in the specified Container.

- b. Upload:

This action button can be used to upload a file from your local system to the specified Container in the Connection Card.

- i. Select **Upload > Upload File (Source)**.

A dialog box will pop-up.

ii. Select **Choose**.

This will open File explorer for your local system.

iii. Navigate to the file you want to upload and then select **Open**.

The file you selected will get uploaded in the specified Container.

c. Download:

This action button can be used to download a file from the specified Container to your local system.

i. Select **Download > Download File (Source)**.

.

A list of **Container Contents** will open.

ii. Select the file you want to download and then select **OK**.

The selected file will get downloaded to your default Downloads folder.

d. Delete Blob:

This action button can be used to delete a file from the specified Container.

i. Select **Delete Blob > Delete File (Source)**.

A list of **Container Contents** will open.

ii. Select the file you want to delete and then select **OK**.

The selected file gets deleted from the specified Container.

Deployment Instructions

Article • 4/29/2023 • 4 min read

Azure Storage

1. Create the Storage Account. In the example displayed below, a Document Link and Blob storage container 'attachments' are created.

For more information on how to create the Azure storage account, [click here](#). For more information on how to create Azure Blob storage containers, [click here](#).

2. Select the storage account and select **Access keys** to retrieve the Storage Account name and Key for accessing the Storage account.

Business Central

1. Create the Blob Storage Connection for the Blob Storage Account as created above.

This setup is part of the Aptean Azure Connector, which offers the ability to connect your Blob storage accounts to be used in Business Central extensions.

Important

If there's a need to keep attachments unique per company, create the storage and set it up per company.
