June 2022	1.2.50226.0	Stability release
September 2021	1.1.34702.0 (BC 18)	Stability release
August 2021	1.1.34702.0	Initial release

2401.4.0.0

Release Note • 2/25/2026 • 1 min read

Resolved issues

The following issue has been resolved in this release.

ID	Description
350429	The system fails to send all lines on the Production Order page to the Production Run API page. This issue occurs when a production order has multiple lines and then the system transmits only the first line, and subsequent lines (such as WIP items configured as Make-To-Order) are skipped due to an error in the loop logic.

2401.3.0.0

Release Note • 2/3/2025 • 1 min read

Resolved issues

The following issue has been resolved in this release.

ID	Description
236142	The system incorrectly displays an error message while creating a Released Production Order with the Source Type field value set to <i>Family</i> option, and the item's default routing contains active versions.

2401.2.0.0

Release Note • 12/10/2024 • 1 min read

Enhancements/Modifications

With this release of the Aptean Process Manufacturing OEE extension,

- The **Units per Cycle** field on the **Routing** and **Routing Version** pages indicates the number of units produced per cycle or batch, which is used to calculate the planned cycles for a production order line that uses the routing.
- The formula for calculating **Planned Cycles** field in a production order line has been changed to use **Quantity (Base)** instead of **Quantity** field. This change ensures the value remains correct when a non-base UOM is used for the production order line.

UI/UX changes

The **Units per Cycle** field has been added to **Aptean Process Manufacturing OEE** FastTab on the **Routing** and **Routing Version** pages.

2401.1.0.0

Release Note • 8/13/2024 • 1 min read

Enhancements/Modifications

With this release of the Aptean Process Manufacturing OEE extension, modifications were made to accommodate the following changes:

- Enhanced application interaction: Procedures have been added to enhance the application interaction, improve upgrade tag management, streamline upgrade and installation processes, and provide additional flexibility by managing upgrades on a per-company and per-database basis.
- Application area refresh: Updates have been implemented to improve the application area refresh process by integrating a new procedure into the *Enable* codeunit.
- Improved management of install and upgrade code: The *Install* and *Upgrade* codeunits have been updated to streamline the handling of installation, reinstallation, and upgrade processes, ensuring smoother transitions and minimizing disruptions during these operations.
- Centralized license management procedures: The existing license management codeunit has been modified to use centralized license management procedures, further reducing the need for application-specific adjustments.
- Enhancements have been made to update the process within the application to handle the *User Group* and *User Group Permission Set* tables. This change ensures compatibility with current and future versions of Business Central, even when the *User Group* and *User Group Permission Set* tables are deprecated.

! Note

The *User Group* and *User Group Permission Set* tables are deprecated in Business Central, version 25.

2401.0.0.0

Release Note • 8/19/2024 • 1 min read

Enhancements/Modifications

With this release of the Aptean Process Manufacturing OEE extension, you can:

- View the average output per hour value on the **Routing**, **Routing Version**, and **Released Production Order** pages. This value is calculated by multiplying the Tmax per minute value by 60, providing an overview of the hourly output. You can also manually enter or edit the average output per hour value as needed.
- Send the average output per hour value to the APMOEE portal along with the other relevant information on the released production order.

UI/UX changes

The following UI/UX changes have been made in this release.

- The **APMOEE AOR per Hour** field is added to the **Released Production Order** page.
- The **Average Output per Hour** field is added to the **Routing** and **Routing Version** pages.
- The **APMOEE Output per Minute** field is renamed to **APMOEE Tmax per Minute** on the **Released Production Order** page.
- The **Output per Minute** field is renamed to **Tmax per Minute** on the **Routing** and **Routing Version** pages.

2301.2.0.0

Release Note • 5/29/2024 • 1 min read

Enhancements/Modifications

With this release of the Aptean Process Manufacturing OEE extension, the system allows special characters in the description of both items and Units of Measure when sending the product details to the APMOEE portal upon executing the **Send Product** action from the following pages:

- **Items** list
- **Item Card**
- **Locations** list
- **Location Card**

For more information, see [Send and Update Product Details](#) and [Send and Update Product Unit of Measures \(UOM\) Details](#).

2301.1.0.0

Release Note • 10/17/2023 • 1 min read

Resolved issues

The following issue has been resolved in this release:

ID	Description
152022	The APM OEE Asset and APM OEE Output per Minute fields are missing on the Firm Planned Production Order/Released Production Order lines when a Production Order is created from the Planning Worksheet.

1.2.50226.0

Release Note • 4/6/2023 • 1 min read

Enhancements/Modifications

Minor technical changes are made to keep our apps in line with the *updated* coding guidelines for Business Central.

1.1.34702.0 (BC 18)

Release Note • 4/6/2023 • 1 min read

Enhancements/Modifications

The APMOEE Connector for Aptean Food and Beverage ERP was updated to work with the Microsoft Dynamics 365 Business Central 2021 Release Wave 1 platform.

This release of APMOEE Connector for Aptean Food and Beverage ERP has the following enhancements:

- APMOEE Connector is upgraded and now made compatible with Business Central 18.
- APMOEE Connector V1.1 is made compatible with JustFood and bcFood.

1.1.34702.0

Release Note • 4/6/2023 • 1 min read

Enhancements/Modifications

This Business Central extension is to manage setups for integration with **APMOEE**.

The APMOEE Connector for Aptean Food and Beverage ERP, originally created for Vanilla BC 18 (Business Central) environment and Dynamics NAV 2017 (Vanilla), is now made compatible for both NAV 2017 Vanilla and BC 18 versions too.

Introduction

Article • 4/6/2023 • 1 min read

Aptean provides integration capability between Dynamics 365 Business Central (BC) and the Aptean Process Manufacturing Overall Equipment Effectiveness (APMOEE) portal.

The integration lets you to gather all relevant **Product** and **Production Order** data from various Business Central tables (manually or via a Job Queue Entry) and send it to the APMOEE portal through web services. It also allows you to send single or multiple **Item** records through report filters.

Setup

Article • 4/23/2025 • 1 min read

The following setups are required.

- [Install the APMOEE Extension](#)
- [Manage permission sets](#)
- [Generation of Access Token](#)

Install the APMOEE Extension

Article • 4/6/2023 • 3 min read

The **Aptean Professional Services (PS)** team will guide the customer through the installation process.

Note

Only the Aptean internal community can access the site.

To install the APMOEE extension:

1. Select the Search icon  , enter **Extension Management** and then choose the related link.

The **Extension Management** page opens.

2. Select the APMOEE extension, click  , and then select **Install**.

3. Select **Next** on the **Extension Installation** page.

The **Review Extension Information Before Installation** page opens.

4. Choose your language in the **Language** box and turn on the “**I accept the terms and conditions**” button.

5. Select **Install** to install the APMOEE extension.

A dialog confirms the successful installation of the APMOEE BC Connector.

6. Click **OK** to close the dialog.

Manage permission sets

Article • 4/23/2025 • 3 min read

Permission sets in Business Central define a user's access level to various features and data within this extension.

We provide the following system permission sets:

- Direct
- Indirect

Direct permission sets

Users with this permission set can perform specific actions directly without requiring additional approvals or workflows. These sets include permissions to read, modify, delete, and create data.

The direct permission set ID for this extension is *APMOEEFDW*.

Indirect permission sets

Users with this permission set can perform specific actions. This is used in conjunction with other permission sets and typically involves additional conditions or approvals before an action can be completed.

The indirect permission set ID for this extension is *APMOEEBASICFDW*.

User-defined permission sets

In addition to the system permission sets we provide, you can create new permission sets or copy system permission sets and modify or delete access to specific entities according to your requirements. For more information, see

[Assign permissions to users and groups](#).

Assign a permission set

1. Select the Search icon , enter **Users**, and then choose the related link.

The **Users** list page opens.

2. Navigate to the username for which you want to assign the permission set and select it.

The **User Card** page opens.

3. On the **User Permission Sets** FastTab, in the **Permission Set** field, enter the valid permission set for this extension.

The associated fields are automatically updated based on the entered value. The user has the necessary

permissions to use the features of the Aptean Process Manufacturing OEE extension, ensuring secure and role-based access.

Generation of Access Token

Article • 2/2/2024 • 4 min read

Before you can share data with the **APMOEE** portal, you must generate an access token using Job Queue in Business Central to establish a connection with APMOEE portal.

Prerequisites

Prior to generate an access token within Business Central, you must have an **"APMOEE Admin"** role assigned. Also you need a Valid Admin Email, Server Name, User Name and Password.

Set Up Job Queue to Generate Access Token

You need to setup a Job Queue with name *APMOEEAccessTokenSchedulerFDW*. This is the primary approach to generate access token and runs according to the specified re-occurrence time set in the background. The access token expires and re-generates after the re-occurrence time.

1. Select the Search icon  , enter **Job Queue Entries** and then choose the related link.

The **Job Queue Entries** page opens.

2. Click **New** to create a job queue with name *APMOEEAccessTokenSchedulerFDW*.
3. On the **Recurrence** FastTab, turn on the toggles for every day of the week.
4. In the **No. of Minutes between Runs** field, enter a value less than the frequency of OEE changing the token.
5. Select the **Job Queue** and click **Set Status to Ready**.
6. The generated access token will be stored on Location Card page in **APMOEE** FastTab.

Note

The token generation frequency in OEE is currently set to 60 minutes. It is recommended to set the **No. of Minutes between Runs** field to 55 minutes to ensure that Business Central initiates the token generation more frequently than OEE.

Set Up Locations for APMOEE on Location Card

To set up locations on the **Location Card**:

1. Select the Search icon  , enter **Locations** and then choose the related link.

The **Locations** page opens.

2. Click any of the **Locations** from the list.

The **Location Card** page opens.

3. In the **APMOEE** FastTab, check the **Enable** button.

4. Enter Admin Email, Server Name, User Name and Password in the respective fields.

 Note

In case of any failures, an email will be sent to the Admin Email address.

5. Enter the **Production Order Inclusion Start Date** and **Production Order Inclusion End Date** in the respective fields.
6. Go to **Related > APMOEE > Test API Connection**.
A dialog confirms that the “**APMOEE API is connected**”.
7. Click **OK** to close the dialog.

Access Token will be generated on Job Queue run and stored on the **Location Card** page in the **APMOEE** FastTab.

Send and Update Product Details

Article • 5/29/2024 • 2 min read

You can send and update the **Product Details** to the **APMOEE** portal manually or through Job Queue.

The system allows special characters in the description of items when sending product details to the APMOEE portal. However, the non-ASCII special characters, such as trademark symbols, will be excluded from the description when sent to the APMOEE portal. Additionally, any text enclosed between the less than (<) and greater than (>) symbols will be excluded along with the symbols. If these symbols appear without any text between them, they will be included in the description.

Prerequisites

Prior to send and update **Product Details**, you must have an **APMOEE Admin** role assigned. Also in Business Central, items must have stock at different locations.

Manually Send and Update Product Details to APMOEE Portal.

Article • 4/6/2023 • 1 min read

You can manually send and update product details from Business Central to the **APMOEE** portal from the following pages:

- [From Item List/Card Page](#): Use this page to send all the product details for all the enabled locations.
- [From Location Card Page](#): Use this Card page to send all the product details for a single location.
- [From Locations List Page](#): Use the List page to send all the product details for multiple locations in case the **Stockkeeping Unit** is not defined.

From Item List/Card Page

Article • 4/6/2023 • 2 min read

1. On the **Item Card** page, on the **APMOEE** FastTab select the required option in the **Product Type** dropdown.

Note

To send the product details, you must fill these above mandatory fields. Once you send a **Product Type** for an Item, you cannot modify it while updating. While sending, the **Target Duration** in the **APMOEE** FastTab will only accept the value if the **Product Type** is defined as "Process".

2. Go to **Actions > APMOEE > Send Product**.
A dialog confirms that "Product sent to APMOEE".
3. Click **OK** to close the dialog.

The product details are sent for all the enabled locations and you can check the same in the **APMOEE** portal.

In case you want to send the product details to specific location from the **Item Card** page, you need to define a **Stockkeeping Unit**.

To define a **Stockkeeping Unit**:

4. Go to **Related > Warehouse > Stockkeeping Units** in the **Item Card** page.
Stockkeeping Units page opens.
5. Click **New**.
Stockkeeping Unit Card page opens.
6. Select the required location from the **Location Code** field in the **General** FastTab.
7. Select **Product Type** from the dropdown in the **APMOEE** FastTab.

Note

If the **Product Type** is defined in the **Stockkeeping Unit Card** page, it won't be fetched from the **Item Card** page.

From Location Card Page

Article • 4/6/2023 • 2 min read

1. Select the Search icon  , enter **Locations** in the search box and then select the related link.

The **Locations** page opens.

2. Click the required **Location** from the list.

The **Location** page opens.

3. Go to **Related > APMOEE > Send Products**.

A dialog confirms that "**Product sent to APMOEE**".

4. Click **OK** to close the dialog.

The Product details are now sent for the specific location and you can check the same in the **APMOEE** portal.

From Locations List Page

Article • 4/6/2023 • 2 min read

1. Select the Search icon  , enter **Locations** and then choose the related link.

The **Locations** page opens.

2. Select the required **Locations** from the list.

3. Go to **Actions** > **APMOEE** > **Send Product**.

A dialog confirms that "**Product sent to APMOEE**".

4. Click **OK** to close the dialog.

The **Product** details are now sent for the selected locations and you can check the same in the **APMOEE** portal.

Automatically Send and Update Product Details to APMOEE Portal.

Article • 4/6/2023 • 2 min read

You must setup a **Job Queue** with name *"APMOEEProductSchedulerFDW"* and Parameter String as **"Products"** to send and update product details to **APMOEE** portal. This **Job Queue** runs according to the specified re-occurrence time set in the background.

1. Select the Search icon  Tell me what you want to do , enter **Job Queue Entries** and then select choose the related link.
The **Job Queue Entries** page opens.
2. Click **New** to create a **Job Queue** with name *"APMOEEProductSchedulerFDW"*.
3. Select the **Job Queue** and click **Set Status to Ready**.

It will send the Product details to **APMOEE** portal as well as will be updated in case of already sent products.

Link Product Group to Product

Article • 4/6/2023 • 1 min read

You can link a **Product Group** to a **Product** from BC with **APMOEE** portal manually or through a job queue.

Prerequisites

Before linking a **Product Group** to a **Product**, you must have an “**APMOEE Admin**” role assigned. You must create a **Product Group** in BC similar to the one created in the **APMOEE** portal. Also, Items must be sent from Business Central to the **APMOEE** portal.

Creation of Product Group in Business Central

Article • 4/6/2023 • 2 min read

You can create the **Product Group** in the **Item Card** page as well as in the **APMOEE Product Group** page.

1. Select the Search icon  Tell me what you want to do , enter **APMOEE Product Group** and then choose the related link.

The **APMOEE Product Group** page opens.

2. Click **New** and enter the **Product Group** name, same as in the **APMOEE** portal.

The **Product Group** is created.

Note

You can also create the **Product Group** in the **Product Group** field in the **APMOEE** FastTab available on the **Item Card** page.

Manually Link Product Group to Product

Article • 4/6/2023 • 2 min read

To manually link a **Product Group** to a **Product** and send the updated **Product Group** details:

1. Select the **Product Group** under the **APMOEE** FastTab on the **Item Card** page.
2. Select the Search icon  , enter **Locations** and then choose the related link.

The **Locations** page opens.

3. To link the **Product Group** to a **Product** and send the updated **Product Group** details from the **Locations** page, select the **Locations** from the list.
4. Go to **Actions > APMOEE > Link Product Groups**.
A dialog confirms that “**Product Groups sent to APMOEE**”.
5. Click **OK** to close the dialog.

You can also link the **Product Group** to a **Product** and send the updated **Product Group** details from the **Location Card** page.

6. Click the **Location** listed in the **Locations** page. The **Location Card** page opens.
7. Go to **Related > APMOEE > Link Product Groups**.
A dialog confirms that “**Product Groups sent to APMOEE**”.
8. Click **OK** to close the dialog.

The **Product Group** is now linked to the **Product** and you can see it on the **APMOEE** portal.

Automatically Link Product Group to Product

Article • 4/6/2023 • 2 min read

You need to setup a **Job Queue** with name *"APMOEEProductSchedulerFDW"* and Parameter String as **"Products Groups"** to link the **Product Group** to the **Product** and send the updated **Product Group** details to the **APMOEE** portal. This **Job Queue** runs according to the specified re-occurrence time set in the background.

1. Select the Search icon  Tell me what you want to do , enter **Job Queue Entries** and then choose the related link.
The **Job Queue Entries** page opens.
2. Click **New** to create a **Job Queue** with name *"APMOEEProductSchedulerFDW"*.
3. Select the **Job Queue** and click **Set Status to Ready**.

It will link the **Product Group** to **Product** and send the updated **Product Group** details to the **APMOEE** portal.

Send and Update Product Unit of Measures (UOM) Details

Article • 5/29/2024 • 2 min read

You can send and update the **Product UOM** to the **APMOEE** portal manually or through Job Queue.

The system allows special characters in the description of Units of Measure when sending product details to the APMOEE portal. However, the non-ASCII special characters, such as trademark symbols, will be excluded from the description when sent to the APMOEE portal. Additionally, any text enclosed between the less than (<) and greater than (>) symbols will be excluded along with the symbols. If these symbols appear without any text between them, they will be included in the description.

Prerequisites

Prior to send and update **Product UOM** details, you must have an **APMOEE Admin** role assigned. Also you must create **Product UOM** in Business Central.

Define Product UOM Details in Business Central

Article • 4/6/2023 • 1 min read

The **Base Unit of Measure** is defined on the **Item Card** page. To define the **UOM** conversion:

1. Go to **Related > Item > Units of Measure** on the **Item Card** page.
Item Units of Measure page opens.
2. Define the **UOM** conversion below the **Base Unit of Measure**.
3. Enter **Code** and **Qty. per Unit of Measure** in the respective columns.
4. Click **Edit List**.
5. Click **Back** to view the **Item Card** page.

The **UOM** conversion is now defined.

Manually Send and Update Product UOM Details to APMOEE Portal.

Article • 4/6/2023 • 2 min read

To manually send and update **Product UOM** details:

1. Select the Search icon  , enter Locations and then choose the related link.

The **Locations** page opens.

To send and update **Product UOM** details from the **Locations** page, select the **Locations** from the list.

2. Go to **Actions > APMOEE > Send Product UOM**.

A dialog confirms that “**Product UOM sent to APMOEE**”.

3. Click **OK** to close the dialog.

You can also send and update **Product UOM** details from the **Location Card** page.

4. Click the **Location** listed in the **Locations** page.

The **Location Card** page opens.

5. Go to **Related > APMOEE > Send Product UOM**.

A dialog confirms that “**Product UOM sent to APMOEE**”.

6. Click **OK** to close the dialog.

Automatically Send and Update Product UOM Details to APMOEE portal

Article • 4/6/2023 • 2 min read

You need to setup a **Job Queue** with name "*APMOEEProductSchedulerFDW*" and Parameter String as "**Products UOM**" to send and update **Product UOM** details to the **APMOEE** portal. This **Job Queue** runs according to the specified re-occurrence time set in the background.

1. Select the Search icon  Tell me what you want to do , enter **Job Queue Entries** and then choose the related link.
The **Job Queue Entries** page opens.
2. Click **New** to create a **Job Queue** with name "*APMOEEProductSchedulerFDW*".
3. Select the **Job Queue** and click **Set Status to Ready**.

It will send and update **Product UOM** details to the **APMOEE** portal.

Send Released Production Order

Article • 4/6/2023 • 1 min read

You can send **Released Production Order** to the **APMOEE** portal manually or through Job Queue.

Prerequisites

Prior to send **Released Production Order**, you must have an “**APMOEE Admin**” role assigned. Also make sure the Locations are enabled and Items in Business Central are sent to **APMOEE** portal.

Creation of Released Production Order in Business Central

Article • 8/6/2024 • 3 min read

Prior to creating a **Released Production Order**, make sure you perform the below tasks:

1. Define the **Routing** for the **Product** to be sent.
2. The **Asset Type** selected in the **Routing** page under the **APMOEE** FastTab for the **Product Type** must be defined in the **APMOEE** portal.
3. Also the **Production Order Inclusion Start Date** and **Production Order Inclusion End Date** must be defined in the **Location Card** page.

To create a **Released Production Order**:

4. Select the Search icon  Tell me what you want to do , enter **Released Production Order**, and then choose the related link.
The **Released Production Orders** list page opens.
5. On the action bar, select **New**. A new **Released Production Order** card page opens.
6. In the **Source No.** field, select a value from the dropdown.
7. In the **Due Date** and **Quantity** fields, enter the required values.
8. On the action bar, select **Process** > **Refresh Production Order**.
The **Refresh Production Order** page opens.
9. Select **OK**.

The **Released Production Order** is now created and if required, you can change the **APMOEE Asset Type**, **Routing** and **Routing Version Code** from the lines.

The **Tmax per Minute** and **Average Output per Hour** field values on the **Routing** or **Routing Version** page are inherited to the **APMOEE Tmax per Minute** and **APMOEE AOR per Hour** fields on the released production order line based on the setup. These details will also be sent to the **APMOEE** portal along with the other relevant information.

Manually Send Released Production Order to APMOEE Portal

Article • 4/6/2023 • 1 min read

You can manually send **Released Production Order** from Business Central to the **APMOEE** portal from the following pages:

- [From Release Production Order Card Page](#): Use this Card page to send a single **Released Production Order** for a single location.
- [From Release Production Orders List Page](#): Use this Card page to send multiple **Released Production Orders** for a single location.
- [From Location Card Page](#): Use this Card page to send single **Released Production Order** for a single location.
- [From Location List Page](#): Use this Card page to send multiple **Released Production Orders** for a single location.

From Release Production Order Card Page

Article • 4/6/2023 • 1 min read

To send a **Released Production Order** from **Released Production Order Card** page:

1. Select the **Location Code** in the **Posting** FastTab.
2. Go to **Actions > APMOEE > Send Production Order**.
A dialog confirms that "**Production Order sent to APMOEE**".
3. Click **OK** to close the dialog.

The Status in the **APMOEE** fast is now changed to "**Sent**" and also **APMOEE** log is generated to confirm the action.

From Release Production Orders List Page

Article • 4/6/2023 • 1 min read

To send multiple **Released Production Orders** from **Released Production Orders List** page:

1. Select the **Released Production Orders** from the list.
2. Go to **Actions > APMOEE > Send Production Orders**.
A dialog confirms that "**Production Orders sent to APMOEE**".
3. Click **OK** to close the dialog.

In the **APMOEE** FastTab, the status is changed to **Sent** and an **APMOEE** log is generated to confirm the action.

From Location Card Page

Article • 4/6/2023 • 2 min read

You can send a **Released Production Order** from the **Location Card** Page:

1. Select the Search icon  , enter **Locations** and then choose the related link.

The **Locations** page opens.

2. Click the **Location** listed in the **Locations** Page.

The **Location Card** page opens.

3. Go to **Related > APMOEE > Send Production Orders**.

A dialog confirms that “**Production Order sent to APMOEE**”.

4. Click **OK** to close the dialog.

APMOEE log is generated to confirm that the **Production Order** is now sent.

From Location List Page

Article • 4/6/2023 • 2 min read

You can send multiple **Released Production Orders** from the **Location List** page.

1. Select the Search icon  , enter **Locations** and then choose the related link.

The **Locations** page opens.

2. Select the **Location** from the list.
3. Go to **Actions > APMOEE > Send Production Order**.
A dialog confirms that "**Production Order sent to APMOEE**".
4. Click **OK** to close the dialog.

APMOEE log is generated to confirm that **Production Order** has been sent.

Automatically Send Released Production Order to APMOEE Portal

Article • 2/2/2024 • 3 min read

You need to setup a **Job Queue** with name *APMOEEProdRunSchedulerFDW* to send **Released Production Order** to the **APMOEE** portal. This **Job Queue** runs according to the specified re-occurrence time set in the background.

1. Select the Search icon  Tell me what you want to do , enter **Job Queue Entries** and then choose the related link.
The **Job Queue Entries** page opens.
2. Click **New** to create a **Job Queue** with name *APMOEEProdRunSchedulerFDW*.
3. On the **Recurrence** FastTab, turn on the required toggle.
For example, if you want the job queue to be run on every wednesday, turn on the **Run on Wednesdays** toggle.
4. In the **No. of Minutes between Runs** field, enter a desired value.
For example, if you want to send the orders once per day, then the value shall be entered as 1440 minutes.
5. Select the **Job Queue** and click **Set Status to Ready**.

It will send the Released Production Orders to the **APMOEE** portal. Additionally, it will send any orders that are within the range defined in the **Prod. Order Inclusion Start Date** and **Prod. Order Inclusion End Date** fields on the **Location Card** page.

Note

The related notification will be sent to the email address provided in the **Admin Email** field on the **Aptean Process Manufacturing OEE** FastTab of the associated **Location Card** page when there is a failure with API.
