To view what's new or changed in each release of the Aptean Audit Trail extension, select the specific release version.

Date	Release version	Description
July 2026	2601.0.0.0	Major release
July 2025	2401.2.0.0	Stability release
April 2025	2401.1.0.0	Stability release
November 2024	2401.0.0.0	Feature release
August 2024	1.12.178746.0	Stability release
July 2024	1.11.170078.0	Stability release
May 2024	1.10.162222.0	Stability release
March 2024	1.9.147262.0	Stability release
December 2022	1.8.71919.0	Stability release
April 2022	1.7.46570.0	Stability release

2601.0.0.0

Release Note • 7/22/2026 • 1 min read

Enhancements/Modifications

With this release of the Aptean Audit Trail extension, a validation has been added to avoid retrieving an Item Attribute Value record when the Item Attribute Value ID is 0. This is a technical stability improvement and does not introduce any functional changes.

2401.2.0.0

Release Note • 7/2/2025 • 1 min read

Enhancements/Modifications

With this release of the Aptean Audit Trail extension, the translation file for the Chinese (zh-CN) language has been added.

2401.1.0.0

Release Note • 4/25/2025 • 1 min read

Enhancements/Modifications

The translation files for the Swedish (sv-SE) language have been updated with standard texts for better readability.

2401.0.0.0

Release Note • 11/5/2024 • 1 min read

Enhancements/Modifications

With this release of the Aptean Audit Trail extension, you can log changes to feature states (enabled/disabled). To know more, see [What's new in Feature Control, version 2401.0.0.0](#).

1.12.178746.0

Release Note • 8/26/2024 • 1 min read

Enhancements/Modifications

With this release of the Aptean Audit Trail extension, the process has been enhanced to manage the *User Group* and *User Group Permission Set* tables. This ensures compatibility with both current and future versions of Business Central, even when these tables are deprecated.

Note

The *User Group* and *User Group Permission Set* tables are deprecated in Business Central, version 25.

1.11.170078.0

Release Note • 7/8/2024 • 1 min read

Enhancements/Modifications

The translation files for the following languages have been updated with standard texts for better readability.

- Danish (da-DK)
- German (de-DE)
- French (fr-FR)
- Dutch (nl-NL)
- Swedish (sv-SE)

1.10.162222.0

Release Note • 5/28/2024 • 1 min read

Enhancements/Modifications

With this release of the Aptean Audit Trail extension, modifications have been made to accommodate the following changes:

- Enhanced application interaction: Procedures have been added to enhance the application interaction, improve upgrade tag management, streamline upgrade and installation processes, and provide additional flexibility by managing upgrades on a per-company and per-database basis.
- Application area refresh: Updates have been implemented to improve the application area refresh process by integrating a new procedure into the *Enable* codeunit.
- Improved management of install and upgrade code: The *Install* and *Upgrade* codeunits have been updated to streamline the handling of installation, reinstallation, and upgrade processes, ensuring smoother transitions and minimizing disruptions during these operations.
- Centralized license management procedures: The existing license management codeunit has been modified to use centralized license management procedures, further reducing the need for application-specific adjustments.

1.9.147262.0

Release Note • 3/7/2024 • 1 min read

Enhancements/Modifications

With this release of the Aptean Audit Trail extension, the issues arising from the indirect permission set have been effectively resolved to ensure the seamless functionality of the extension.

1.8.71919.0

Release Note • 4/3/2023 • 1 min read

Enhancements/Modifications

Modifications were made for the Aptean Audit Trail extension to accommodate the changes made to the Aptean Inspection Status extension (1.10.72304.0). To know more, see [What's new in version 1.10.72304.0](#).

1.7.46570.0

Release Note • 4/3/2023 • 1 min read

Enhancements/Modifications

Minor technical changes were made to keep our apps in line with the *updated* coding guidelines for Business Central.

Audit Trail

Article • 4/3/2023 • 6 min read

The Aptean Audit Trail (AUT) extension contains the records that chronologically logs the changes made to the Item Attributes. It provides a historical record of progression based on a sequence of events and can be used for multiple purposes. The audit trail records contain details regarding the date, time, user information and type of change.

1. Select the Search icon , enter **Items** and then choose the related link.

The **Items** list page opens.

2. Select the required item **No.** to open the **Item Card** page.

3. On the action bar, go to **More options** > **Navigate** > **History** > **Entries** > **Audit Trail Entries** to open the **Audit Trail Entries** page.

The **Audit Trail Entries** page contains the following details:

- **Date and Time:** The date and time when this audit trail entry was created
- **User ID:** The user who posted the entry
- **Type of Change:** The type of change associated with the transaction, e.g., "Insertion" or "Modification"
- **Data Type:** The data type of the changed field
- **Name:** The name of the field that is changed
- **Old Value:** The value that was present in the field before the user made modifications to it
- **New Value:** The value present in field after the user made modifications to it

Setup

Article • 11/5/2024 • 1 min read

The following setup is required.

- [Manage permission sets](#)

Manage permission sets

Article • 11/5/2024 • 3 min read

Permission sets in Business Central define a user's access level to various features and data within this extension.

We provide the following system permission sets:

- Direct
- Indirect

Direct permission sets

Users with this permission set can perform specific actions directly without requiring additional approvals or workflows. These sets include permissions to read, modify, delete, and create data.

The direct permission set ID for this extension is *AUDITTRAILFDW*.

Indirect permission sets

Users with this permission set can perform specific actions. This is used in conjunction with other permission sets to allow you to perform certain actions. These permissions typically involve additional conditions or approvals before the action can be completed.

The indirect permission set ID for this extension is *AUDITTRAILBASICFDW*.

User-defined permission sets

In addition to the system permission sets we provide, you can create new permission sets or copy system permission sets and modify or delete access to specific entities according to your requirements. For more information, see [Assign permissions to users and groups](#).

Assign a permission set

1. Select the Search icon , enter **Users**, and then choose the related link.
The **Users** list page opens.
2. Navigate to the username for which you want to assign the permission set and select it.
The **User Card** page opens.
3. On the **User Permission Sets** FastTab, in the **Permission Set** field, enter the valid permission set for this extension.

Audit Trail

The associated fields are automatically updated based on the entered value. The user has the necessary permissions to use the features of the Aptean Audit Trail extension, ensuring secure and role-based access.
