Release notes

Article • 7/22/2026 • 1 min read

To view what's new or changed in each release of the Aptean Feature Control extension, select the specific release version.

Date	Release Version	Description
July 2026	2602.0.0.0	Major release
March 2026	2601.2.0.0	Stability release
February 2026	2601.1.0.0	Stability release
January 2026	2601.0.0.0	Feature release
November 2025	2503.1.0.0	Stability release
October 2025	2503.0.0.0	Feature release
July 2025	2502.0.0.0	Feature release
May 2025	2501.2.0.0	Stability release
April 2025	2501.1.0.0	Stability release
March 2025	2501.0.0.0	Feature release
March 2025	2402.1.0.0	Stability release
December 2024	2402.0.0.0	Feature release
November 2024	2401.0.0.0	Initial release

2602.0.0.0

Release Note • 7/22/2026 • 1 min read

Enhancements/Modifications

This extension has been updated to ensure interoperability with the recent changes in the Aptean Sales & Purchase Conditions for Drink-IT Edition extension. To know more, see [What's new in Sales & Purchase Conditions for Drink-IT Edition, version 2603.0.0.0](#).

2601.2.0.0

Release Note • 3/25/2026 • 1 min read

Enhancements/Modifications

With this release of the Aptean Feature Control extension, the translation file for the Swedish (sv-SE) language has been updated with standard texts for better readability.

2601.1.0.0

Release Note • 2/25/2026 • 1 min read

Enhancements/Modifications

This extension has been updated to ensure interoperability with the recent changes in the Aptean Product Specification extension. To know more, see [What's new in Product Specification, version 2601.3.0.0](#).

2601.0.0.0

Release Note • 1/28/2026 • 1 min read

Features

With the feature added in this release of the Aptean Feature Control extension, you can view application dependencies and see the dependency between extensions.

- When you disable an application, the system automatically disables all dependent applications to prevent unsupported configurations.
- When you enable an application, dependent apps are not enabled automatically. This allows you to selectively enable only the functionality required for your implementation.

UI/UX changes

The **Dependent Apps** and **Dependencies** fields have been added to the **Feature Control** page.

2503.1.0.0

Release Note • 11/26/2025 • 1 min read

Enhancements/Modifications

With this release of the Aptean Feature Control extension,

- The system manages how unit of measure functionality behaves when the Aptean [Standard Measurements](#) extension and the Aptean [Beverage Foundation Management](#) extension, Drink-IT Edition, are installed together. This ensures that the correct units of measure are used during synchronization of field values between the **Item Card** and **Item Units of Measure** pages. To know more, see [Overview of feature control](#).
- The translation file for the Swedish (sv-SE) language has been updated with standard texts for better readability.

2503.0.0.0

Release Note • 10/22/2025 • 1 min read

Enhancements/Modifications

This extension has been updated to ensure interoperability with the recent changes in the Apteian Inspection Status extension. For more information, see [What's new in Inspection Status, version 2504.0.0.0](#).

2502.0.0.0

Release Note • 7/30/2025 • 1 min read

Enhancements/Modifications

With this release of the Aptean Feature Control extension, when the Aptean [Service Provisioning](#) extension is installed, the system updates license plate details on the sales and purchase orders created from the **Transfer Ownership** page based on the configuration on the **Feature Control** page. For more information, see [Integration with Aptean Service Provisioning](#).

Integrations

The Aptean Feature Control extension has been integrated with the Aptean [Service Provisioning](#) extension. For more information, see [Integrations](#).

2501.2.0.0

Release Note • 5/7/2025 • 1 min read

Resolved issues

The following issue has been resolved in this release.

ID	Description
284837	An error occurs when installing or updating the Aptean Quality Control (BC) extension when the Aptean Feature Control extension is installed.

2501.1.0.0

Release Note • 4/30/2025 • 1 min read

Enhancements/Modifications

With this release of the Aptean Feature Control extension,

- The translation file for the Chinese (zh-CN) language has been added.
- The translation file for the Swedish (sv-SE) language has been updated with standard texts for better readability.

2501.0.0.0

Release Note • 3/25/2025 • 1 min read

Enhancements/Modifications

This extension has been updated to ensure interoperability with the recent changes in the Aptean Beverage Sales-Purchase Conditions extension, Drink-IT Edition. For more information, see [What's new in Beverage Sales-Purchase Conditions, version 2501.0.0.0](#).

2402.1.0.0

Release Note • 3/25/2025 • 1 min read

Enhancements/Modifications

With this release of the Aptean Feature Control extension, you can enable or disable the Aptean Quality Control (QCA) for BC extension. This allows you to control whether quality checks are triggered during document processing. This enhancement addresses the issue reported in bug ID #261252. For more information, see [Overview of Feature Control](#) and [What's new in Quality Control \(BC\), version 2503.2.0.0](#).

2402.0.0.0

Release Note • 12/12/2024 • 1 min read

Enhancements/Modifications

With this release of the Aptean Feature Control extension, the system manages the item exclusivity functionality for recurring sales lines in the Aptean Beverage [Advanced Sales Management](#) extension, Drink-IT Edition. To know more, see [Overview of Feature Control](#).

2401.0.0.0

Release Note • 11/5/2024 • 1 min read

Features

With the features added in this release of the Aptean Feature Control extension, you can manage mutual exclusivity between the Aptean [License Plating](#) and Aptean [Advanced Warehouse Management](#) extensions to avoid conflicts, ensuring that only one is active at a time. To know more, see [Overview of Feature Control](#).

Integrations

The Aptean Feature Control extension has been integrated with the Aptean [Audit Trail](#) extension to log changes to feature status (enabled/disabled). To know more, see [Integrations](#).

Introduction

Article • 11/16/2024 • 1 min read

The Aptean Feature Control (FCT) extension provides a centralized interface for managing the activation status of specific extensions in Aptean Food and Beverage. You can enable or disable extensions based on their operational requirements, ensuring seamless integration and conflict-free functionality.

Using the **Feature Control** page, you can view all installed extensions and their current status (*Enabled* or *Disabled*). This extension also enforces dependencies and conditions for certain extensions, helping you maintain system consistency and prevent errors.

Key benefits of the Feature Control extension include:

- Simplified management of multiple extensions.
- Automated handling of dependencies between extensions.
- Clear guidance on the impact of enabling or disabling specific features.

Overview of Feature Control

Article • 11/26/2025 • 4 min read

You can use the **Feature Control** page to manage the activation status of specific extensions. To access the **Feature Control** page,

Select the Search icon , enter **Feature Control**, and then choose the related link.

This page lists all the installed applications with their status (*Enabled/Disabled*).

Conditions for enabling or disabling extensions

The following conditions explain how to manage the enabling or disabling of extensions.

- To enable an extension, ensure the other extension is disabled. Enabling one extension will automatically disable the other if it is already enabled.
- If you disable one of the extensions, all functionalities of that extension are no longer available for use.

Note

If the extension was previously enabled before uninstalling, its status may remain enabled until it is manually adjusted or related extensions are managed.

- When the Aptean License Plating extension is enabled, the packaging caption on the **Inventory Setup** page is *License Plate*. If the extension is disabled, the field remains blank.
- The Aptean [License Plating](#) extension cannot be disabled if open item ledger entries have a non-blank packaging number. To disable Aptean License Plating extension, ensure that all such records are removed or managed appropriately.
- The Aptean [Advanced Warehouse Management](#) extension cannot be disabled if there is at least one record in the license plate content table. To disable Aptean Advanced Warehouse Management extension, all license plate content records must be removed or managed accordingly.

Note

After the Aptean License Plating and Aptean Advanced Warehouse Management extensions are installed, the Aptean Feature Control extension configures automatically, and their statuses on the **Feature Control** page appear as blank.

- The Aptean Beverage Advanced Sales Management extension, Drink-IT Edition, does not allow the item exclusivity functionality based on recurring sales lines, to be disabled after upgrading to version [2404.0.0.0](#). If any

issues occur during the transition to this new feature, the system will notify you with a message about the conflicts.

- The Apteian [Quality Control \(QCA\) extension for BC](#) can be enabled or disabled to manage quality check triggers during document processing. When enabled, quality checks are automatically triggered based on predefined configuration. To disable the extension, ensure that no active quality control checks or dependencies that could interfere with ongoing processes exist.
- For the *Apteian Standard Measurements for Food and Beverage* application, the *Enable/disable UOM Group Code functionality* feature is automatically set to *Disable* when the Apteian [Beverage Foundation Management](#) extension, Drink-IT Edition, is installed. As a result, the fields on the **Weight** FastTab of the **Standard Measurements Setup** page and related functionality are not used. The fields are inactive and no longer used by the system. During item and item unit of measure synchronization, the following fields on the **Item Card** page are updated automatically based on the field values of the **Item Units of Measure** page:
 - Unit Volume
 - Unit Volume UoM
 - Net Weight
 - Net Weight UoM
 - Gross Weight
 - Gross Weight UoM

The system uses the **Quantity Expressed in Base UoM** and **Quantity Expressed in the UoM** field values from the **Item Units of Measure** page to update these values.

Integrations

Article • 7/30/2025 • 1 min read

The Apteian Feature Control extension has been integrated with the following extensions:

- [Apteian Audit Trail](#)
- [Apteian Service Provisioning](#)

Aptean Audit Trail

Article • 7/30/2025 • 1 min read

When the Aptean Feature Control extension is used in conjunction with the Aptean [Audit Trail](#) extension, the system logs changes to feature status (enabled/disabled) and captures details, such as date, time, user ID, modified field, old value, and new value. To configure this, on the **Feature Control** page, on the action bar, select **Related > Audit Trail Entries**.

Aptean Service Provisioning

Article • 7/30/2025 • 1 min read

When the Aptean Feature Control extension is used in conjunction with the Aptean [Service Provisioning](#) extension, the system updates license plate details on the sales and purchase orders created from the **Transfer Ownership** page either from the Aptean [License Plating](#) extension or the Aptean [Beverage Advanced Warehouse Management](#) extension, Drink-IT Edition, based on the configuration on the **Feature Control** page. For more information, see [Transfer the ownership of items](#).
