- [What's new in Beverage Tax Management, version 2501.0.0.0](#)

2501.0.0.0

Release Note • 3/18/2025 • 1 min read

Features

With this release of the Aptean Beverage Foundation Layer extension, Drink-IT Edition, the field values in the **Loan in Use** section are correctly retained in posted sales invoice and purchase credit memo lines, ensuring accurate information inheritance during document copying and return processing. The field values in the **Loan in Use** section are correctly inherited when using related functions such as **Get Posted Document Lines to Reverse**, **Correct Invoice**, and other Business Central functions from the **Posted Sales Invoice** page. These changes also apply to purchase return documents, ensuring that the loan in use status is consistently carried over in all relevant workflows.

Resolved issues

The following issue has been resolved in this release.

ID	Description
275529	The system incorrectly calculates the Total Gross Weight , Total Volume , and Total Outstanding (Base) field values on the Purchase Invoice , Posted Purchase Receipt , and Posted Sales Shipment pages.

Release Note • 9/10/2024 • 1 min read

Enhancements/Modifications

With this release of Aptean Beverage Foundation Layer extension, Drink-IT edition, the obsolete code using the payment buffer record in the *SuggestVendPayments101FDW* report has been removed.

Note

The payment buffer record has been replaced with the vendor payment buffer record in Business Central, version 25.

Introduction

Article • 7/2/2025 • 1 min read

The Aptean Beverage Foundation Layer (FLD) extension, Drink-IT Edition, acts as a bridge, connecting installed Aptean Beverage extensions to enable seamless interaction. It allows extensions to communicate independently, eliminating the need for external dependencies. However, it is important to note that extensions using the Aptean Beverage Foundation Layer extension, Drink-IT Edition, are inherently dependent on it for functionality. This extension lays the groundwork for the overall application architecture, ensuring uniformity, scalability, and ease of maintenance across all installed Aptean Beverage extensions. With this app, data can be shared, functionalities can be accessed between Aptean Beverage extensions, and beverage processes can be integrated without additional dependencies. Extensions can also be developed and maintained independently of one another.

If an extension is not installed, the interface with the Aptean Beverage Foundation Layer extension, Drink-IT Edition, will simply not respond, preventing errors. This allows you to choose which extensions you want to use and install or upgrade independently, provided there are no compatibility issues.
