Enhancements/Modifications

This extension has been updated to include the fields and FastTabs added to the Aptean Fresh Bridge extension. To know more, see [What's new in Fresh Bridge, version 2402.0.0.0](#).

Introduction

Article • 11/19/2024 • 1 min read

The Apteian Foundation Layer Fresh (FLF) extension, acts as a bridge, connecting installed Apteian Fresh extensions to enable seamless interaction. It allows extensions to communicate independently, eliminating the need for external dependencies. However, it is important to note that extensions using the Apteian Foundation Layer Fresh extension, are inherently dependent on it for functionality. This extension lays the groundwork for the overall application architecture, ensuring uniformity, scalability, and ease of maintenance across all installed Apteian Fresh extensions.

With the Apteian Foundation Layer Fresh extension, the Apteian Fresh extensions can be developed and maintained independently of one another. If an extension is not installed, the Apteian Foundation Layer Fresh extension interface will simply not respond, preventing errors. This allows you to choose which extensions you want to use and install or upgrade independently, provided there are no compatibility issues.
