January 2023	1.0.66324.0	Stability release
July 2022	1.0.55399.0	Feature release

1.1.235922.0

Release Note • 5/27/2025 • 1 min read

Enhancements/Modifications

With this release of the Aptean Reporting Translation extension,

- The translation file for the Chinese (zh-CN) language has been added.
- The translation file for the Swedish (sv-SE) language has been updated with standard texts for better readability.

1.0.66324.0

Release Note • 4/3/2023 • 1 min read

Enhancements/Modifications

Minor technical changes were made to handle localization-specific test scenarios.

1.0.55399.0

Release Note • 4/3/2023 • 1 min read

Features

You can translate the report to your preferred language. For more details, [see here](#).

Introduction

Article • 4/3/2023 • 1 min read

The Apteian Reporting Translation (RTE) extension provides you the flexibility to translate the report in your language of choice other than English.

Setup

Article • 12/23/2024 • 1 min read

The following setup is required.

- [Manage permission sets](#)

Manage permission sets

Article • 12/23/2024 • 3 min read

Permission sets in Business Central define a user's access level to various features and data within this extension. We provide the direct permission set.

Direct permission sets

Users with this permission set can perform specific actions directly without requiring additional approvals or workflows. These sets include permissions to read, modify, delete, and create data.

The direct permission set ID for this extension is *REPORTTRANS62FDW*.

User-defined permission sets

In addition to the system permission set we provide, you can create new permission sets or copy system permission sets and modify or delete access to specific entities according to your requirements. For more information, see [Assign permissions to users and groups](#).

Assign a permission set

1. Select the Search icon , enter **Users**, and then choose the related link.
The **Users** list page opens.

2. Navigate to the username for which you want to assign the permission set and select it.
The **User Card** page opens.

3. On the **User Permission Sets** FastTab, in the **Permission Set** field, enter the valid permission set for this extension.

The associated fields are automatically updated based on the entered value. The user has the necessary permissions to use the features of the Apteian Reporting Translation extension, ensuring secure and role-based access.

Translations

Article • 4/3/2023 • 3 min read

In case, you wish to get the report in your language of choice other than English, the Reporting Translation extension provides the flexibility to do so with a translation table. A translation table allows you to add the texts and captions that you wish to translate.

To enter a text to translate, perform the following steps:

1. Select the Search icon , enter the text *Reporting Translations*, and choose the relevant link.
2. Select **New**.
3. In the **Translate From Language** field, select the Language Code. For example, 'ENU'.
The language name gets filled automatically.
4. In the **Text** field, enter the text that you want to translate. For example, 'Quantity'.
5. In the **Translate To Language** field, select the Language Code. For example, 'FRA'.
The language name gets filled automatically.
6. In the **Translated Text** field, enter the text that should display in the translated report. This text should be the translated form of the entered **Text** in the Translate To Language. For example, 'Quantité'.

The printed report displays the entered Text based on the Language Code entered in the source document. The above steps can be repeated as many times as required for various texts and languages, depending on your requirement.

If a text in the report has not been registered in the Reporting Translations table, the report displays the standard text i.e. the text in the Translated From Language.
