Release Notes

Article • 11/26/2025 • 1 min read

To view what's new or changed in each release of the Aptean Telemetry extension, select the specific release version.

Date	Release version	Description
November 2025	2401.1.0.0	Stability release
August 2024	2401.0.0.0	Feature release
December 2022	1.0.71129.0	Initial release

2401.1.0.0

Release Note • 11/26/2025 • 1 min read

Resolved issues

The following issue has been resolved in this release.

ID	Description
326912	The system incorrectly creates background tasks when delegated administrators log in, which causes Aptean environments to stop loading as expected.

2401.0.0.0

Release Note • 8/2/2024 • 1 min read

Enhancements/Modifications

With this release of the Aptean Telemetry extension, enhancements have been made to update the process within the application to handle the *User Group* and *User Group Permission Set* tables. This change ensures compatibility with current and future versions of Business Central, even when the *User Group* and *User Group Permission Set* tables are removed.

Note

The *User Group* and *User Group Permission Set* tables are removed in Business Central, version 25.

1.0.71129.0

Release Note • 4/3/2023 • 1 min read

Features

Report number of users

The Telemetry extension gathers data about the extensions installed in your environment and reports the number of enabled users per license type. This helps Aptean keep track of the increase in application users.

Telemetry

Article • 4/3/2023 • 1 min read

Introduction

The Aptean Telemetry (TEL) extension enables Aptean to monitor the state of your Business Central Environment. The logs created are used to analyze and evaluate telemetry data to find performance issues, view system data, and assess errors. This extension helps to improve your experience.

General setup

Article • 11/12/2024 • 1 min read

The following setup is required.

[Manage permission sets](#)

Manage permission sets

Article • 11/12/2024 • 3 min read

Permission sets in Business Central define a user's access level to various features and data within this extension.

We provide the following system permission sets:

- Direct
- Indirect

Direct permission sets

Users with this permission set can perform specific actions directly without requiring additional approvals or workflows. These sets include permissions to read, modify, delete, and create data.

The direct permission set ID for this extension is *TELEMETRY88FDW*.

Indirect permission sets

Users with this permission set can perform specific actions. This is used in conjunction with other permission sets to allow you to perform certain actions. These permissions typically involve additional conditions or approvals before the action can be completed.

The indirect permission set ID for this extension is *TELEMETRYBASIC88FDW*.

User-defined permission sets

In addition to the system permission sets we provide, you can create new permission sets or copy system permission sets and modify or delete access to specific entities according to your requirements. For more information, see [Assign permissions to users and groups](#).

Assign a permission set

1. Select the Search icon , enter **Users**, and then choose the related link.
The **Users** list page opens.
2. Navigate to the username for which you want to assign the permission set and select it.
The **User Card** page opens.
3. On the **User Permission Sets** FastTab, in the **Permission Set** field, enter the valid permission set for this extension.

The associated fields are automatically updated based on the entered value. The user has the necessary permissions to use the features of the Aptean Telemetry extension, ensuring secure and role-based access.
